MEMORANDUM For: Chairman, Curser Dervice Board

Personnel Director

FROM:

Inspector General

SUBJECT:

Policies affecting Hiring and Promoting agence

Officers

The Director has approved the following policies affecting educational qualifications for hiring and grometing Agency officers

- 1. Educational progress, including the pessession or non-possession of a degree or degrees, is a legitimate consider . tion in evaluating the fitness and potential of a job applicant.
- 2. Once an applicant becomes attached to the Agency, however, he stands exclusively on his record with the gase; and promotion is to be based entirely on that record. It is not proper to consider lack of formal schooling as a deturrent to advancement, or the possession of formal schooling as a reason for advancement, other factors being equal. The practice now prevalent in some administrative offices, of weighing the possessin; of a degree as a factor in procession, is therefore to be abandoned as irrelevant.
- 3. It follows from the above that no job in the agent; is to be rated as requiring formal concational prerequisities (i.e., open only to possessors of given dogrees, except in the two professions of the law and medicine.
